While teaching the Numerical Methods for Engineers course over the last 15 years, the author found a need for a new textbook, one that was less elementary, provided applications and problems better suited for chemical engineers, and contained instruction in Visual Basic® for Applications (VBA). This led to six years of developing teaching notes that have been enhanced to create the current textbook, Numerical Methods for Chemical Engineers Using Excel®, VBA, and MATLAB®. Focusing on Excel gives the advantage of it being generally available, since it is present on every computer—PC and Mac—that has Microsoft Office installed. The VBA programming environment comes with Excel and greatly enhances the capabilities of Excel spreadsheets. While there is no perfect programming system, teaching this combination offers knowledge in a widely available program that is commonly used (Excel) as well as a popular academic software package (MATLAB). Chapters cover nonlinear equations, Visual Basic, linear algebra, ordinary differential equations, regression analysis, partial differential equations, and mathematical programming methods. Each chapter contains examples that show in detail how a particular numerical method or programming methodology can be implemented in Excel and/or VBA (or MATLAB in chapter 10). Most of the examples and problems presented in the text are related to chemical and biomolecular engineering and cover a broad range of application areas including thermodynamics, fluid flow, heat transfer, mass transfer, reaction kinetics, reactor design, process design, and process control. The chapters feature "Did You Know" boxes, used to remind readers of Excel features. They also contain end-of-chapter exercises, with solutions provided.

Introduction to Applied Mathematics for Environmental Science , David F. Parkhurst, Dec 6, 2007, Science, 327 pages. His research areas include mathematical modelling of adaptations of plant leaves to environment, environmental risk analysis, and applications of statistics in environmental.

An engineering approach to optimal control and estimation theory , George M. Siouris, Feb 15, 1996, Science, 407 pages. A much-awaited guide to real-world problems in modern control and estimation. This combined text and reference deals with the design of modern control systems. It is the first.

App Num Meth With Matlab Sie , , Jan 1, 2008,

Numerical Analysis Using MATLAB and Excel, Steven T. Karris, 2007, Education, 632 pages. This text is written primarily for students/readers who have a good background of high-school algebra, geometry, trigonometry, and the fundamentals of differential and integral.

Excel for Scientists and Engineers Numerical Methods, E. Joseph Billo, Mar 16, 2007, Computers, 480 pages. Learn to fully harness the power of Microsoft Excel® to perform scientific and engineering calculations With this text as your guide, you can significantly enhance Microsoft.

Forgiving Troy A True Story of Murder, Mental Illness and Recovery, Thom Bierdz, May 1, 2009, Biography & Autobiography, 288 pages. Thom Bierdz is currently on a recurring role on CBS' The Young and the Restless with seven million daily viewers reprising his role from twenty years ago. He is a fan.

This is the story of learning, relating, and coming of age as seen through the eyes of Erik, the son of an old atomic bomb builder turned rocket scientist. Based on a true story.

Numerical Methods for Chemical Engineers Using Excel, VBA, and MATLAB 2013 1466575344, 9781466575349.
